Ever since I began to take my first steps into the world of full-stack development, I've had a deep appreciation and a strong will to develop innovative technology, whether it be simple website applications or breathtaking UI experiences, I long to leave a mark in the world of technology. I am a freshly budding engineer that is eager to be a sponge and soak up all the knowledge I can and continue to grow with any company that gives me the chance.

Skills

Technical Skills:

HTML5, CSS, GitHub, JavaScript, Node.js, Bootstrap, jQuery, AJAX, MySQL, Express, Heroku, API querying, MongoDB, Mongoose, REACT

Interpersonal Skills:

Multitasker, autonomous worker, team-oriented collaborator, team-focused learner

Projects

OnTrack / Co-Creator

January 2021

Engineered and tested Route functions and back-end frameworks to develop OnTrack, an app specifically designed for University of Denver students to determine and track what sequence of classes they needed in order to graduate. Queried student information through UI databases to create various tables of relevant metadata using SQL and Sequelize

Game-Buzz/ Co-Creator

November 2020

Engineered and maintained the HTML and CSS framework for Game-Buzz, an app where a user answers a series of questions that match a recommended cocktail with a recommended video game to play. Utilized AJAX call methods to query dynamic public APIs

Education

University of Denver / Certificate of Completion

September 2020 - April 2021 Denver, CO

Currently completing the Full Stack Web Development program. Involved in writing, developing, and pushing up fully functional web applications in Github, Heroku, and node.js. Extensively developed both front-end and back-end environments with HTML5, CSS, Javascript,

Bootstrap, and more

Other coursework: Developed code for dynamic, interactive programs, including a random password generator, a weather forecast app, a day-planner, a dynamic work portfolio, a note-taker, an employee management system, and a team-profile generator

Other Work Experience

Black Bottle Brewery / BOH Assistant

November 2018- March 2020 Fort Collins, CO

Lead kitchen team through dinner rush hour tickets and supervised quality control. Multitasked in high-volume, high-intensity environments with changing staff to ensure product delivery to patrons.
