Portfolio: https://codymjohnson.github.io/Updated_Portfolio_2/

Ever since I began to take my first steps into the world of full-stack web development, I've had both a deep appreciation and strong will for developing innovative technology. Whether it be simple website applications or breathtaking UX, I long to leave a mark in the world of technology. I am a freshly budding developer that is eager

Technical Skills

HTML5, CSS, JavaScript, Node.js, React, Express, Bootstrap, jQuery, Axios, MySQL, MongoDB, Mongoose

Interpersonal Skills

Multitasker, autonomous worker, team-oriented collaborator, team-focused learner

Projects

Tour De Hops / Co-Creator **March 2021**

Engineered authentication processes, protected routes, and Front End of Tour De Hops, a mobile-first app for hikers looking for trails and nearby breweries. Implemented auth and React technologies.

OnTrack / Co-Creator **January 2021**

Engineered and tested Route functions and back-end frameworks to develop OnTrack, an app specifically designed for University of Denver students to determine and track what sequence of classes they needed in order to graduate. Queried student information through UI databases to create various tables of relevant metadata using SQL and Sequelize.

Game-Buzz / Co-Creator **November 2020**

Engineered and maintained the HTML and CSS framework for Game-Buzz, an app where a user answers a series of questions that match a recommended cocktail with a recommended video game to play. Utilized AJAX call methods to query dynamic public APIs

Education

University of Denver / Certificate of Completion **September 2020 - April 2021 Denver, CO**

Currently completing the Full Stack Web Development program. Involved in writing, developing, and pushing up fully functional web applications in GitHub, Heroku, and node.js. Extensively developed both front-end and back-end environments with HTML5, CSS, JavaScript, Bootstrap, and more

Other coursework: Developed code for dynamic, interactive programs, including a random password generator, a weather forecast app, a day-planner, a dynamic work portfolio, a note-taker, an employee management system, and a team-profile generator
